PROJECT FLOW

1

 User interacts with the UI (User Interface) to enter Data

2

 The entered data is analyzed by the model which is integrated

3

 Once model analyses the input the prediction is showcased on the UI

PROJECT FLOW AND STRUCTURE:

Collecting the necessary datasets.

Analysing the datasets by checking for null values, handling the missing values, data visualizations and spliting datas.

Training and testing the model and evaluating which model is the best.

Build an application using HTML code and necessary Python code.
